AI sign-in Connect your own AI account to MDLxL

MDLxL 0.31.0

MDLxL does not include an AI subscription. You connect one you already have. Open the AI console (first icon in the module dock) and click the Connection settings button (sliders icon) at the top of the console.

1. AI provider: choose your AI here.
2. Sign in: opens the provider's page in your browser.
3. Model: pick a model, or leave the default.
4. Advanced connection: only needed if MDLxL cannot find the program.

Codex / ChatGPT

For a ChatGPT plan.

1. Install the Codex CLI: developers.openai.com/codex/cli
2. Choose Codex / ChatGPT under AI provider.
3. Click Sign in and finish signing in with your ChatGPT account in the browser.
4. Back in MDLxL you see "Signed in.". Pick a model in the console header and start.

Claude Code

For a Claude plan that includes Claude Code.

1. Install Claude Code: code.claude.com/docs/en/setup
2. Choose Claude Code under AI provider.
3. Click Sign in and finish signing in in the browser.
4. When "Signed in." appears, you are ready.

OpenAI API / Claude API

Pay per use with an API key instead of a plan.

1. Create an API key in your OpenAI or Claude developer account.
2. Choose OpenAI API or Claude API, paste the key into API key.
3. Choose a model that supports tools, then click Save connection.
4. The key is stored encrypted on this PC and only sent to that provider.

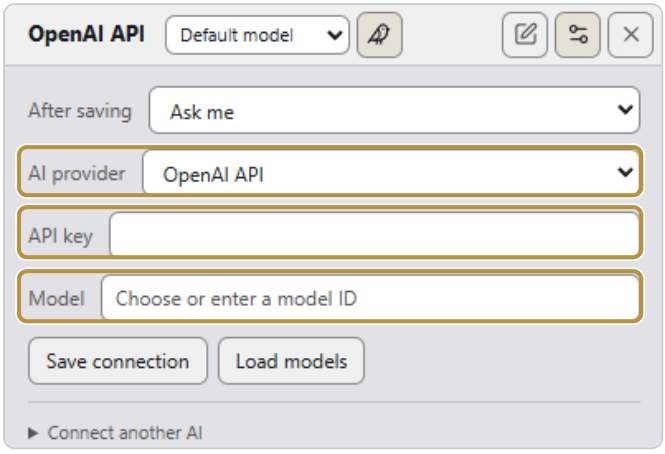

Other AI / local model

Any OpenAI-compatible server, including one running on your own PC.

1. Choose Other AI / local model.
2. Enter the API base URL and the model ID (a local server may not need a key).
3. Click Save connection.

AI sign-in Connect your own AI account to MDLxL

MDLxL 0.31.0

API providers ask for an API key and a model instead of a browser sign-in.

If something goes wrong

- Signed out while writing? Sign in to send keeps your message; send it after “Signed in.” appears.
- Check sign-in tells you whether you are still signed in; Sign out disconnects this AI.
- MDLxL cannot find Codex or Claude Code: restart MDLxL after installing, or enter the full path to codex.exe or claude.exe under Advanced connection.
- Signing in or out needs the AI to be idle: press Stop first.
- Switching to another provider starts a new chat. Billing follows the provider’s own terms.
